

Cornhole

- 1.) Boards must be 27 feet apart. Bags are 6"x6", made of duck cloth, filled with dry feed corn.
- 2.) Game consists of two teams of 1-2 players each, One player from each team throwing from each side, or both players throwing from the same side (1-on-1) One side throws at a time. After both players on a side have alternated and thrown all of their bags, the score is determined. Points cancel out and only one team scores points. Then the other side throws.
- 3.) A corn bag in the 6" hole scores 3 points, while landing one on the 4'x2' platform scores 1 point.
- 4.) Once a bag hits the ground it is dead and shall be removed if lands on board after hitting ground.
- 5.) The team that scores the most points in a session will go first next session.
- 6.) If a team throws a bag when it is not their turn, that bag will be removed from board, no points awarded to this team and they will not get a chance to re-throw bag. If both teams throw out of turn, the round continues as is.
- 7.) First team to reach 21 points wins. Winning team must win by 2 points. If a team is losing by 11 points or more and has not scored yet the game is over. This is called "Skunked".
- 8.) A coin flip will determine who throws red and blue bags.
- 9.) An additional coin flip will determine what team throws first in each game.
- 10.) If board collapses during game it must be re-stood up before next throw.
- 11.) All tosses must be made from inside the pitcher's box or behind game and may be thrown in any fashion.
- 12.) If two players prefer to throw from the same side of the pitcher's box they will take turns throwing from that side.
- 13.) If a non-throwing team member is hit with an incoming bag, that team loses 1 point, and the throwing team gets to throw again. If a throwing team member is hit with an incoming bag, the bag that was throwing does not count, and is not re-thrown.
- 14.) If a bag is picked up off the board before all bags are thrown the other team gets 1 point.
